NARRATIVE REPORT

Name: Joshua M. Rabulan
Year and Course: 4F3 - BSIT
Topic: **Holiday Game Plan: Gamified Campaigns with the Power of AI**
Speaker:
Date and Time: September 24, 2025 (Wednesday) 2:00PM to 4:00PM
Venue: via Google Meet

I. Introduction

In the webinar "*Holiday Game Plan: Gamified Campaigns with the Power of AI,*" we learned how businesses can use gamification and artificial intelligence to improve customer engagement during holidays. The speaker explained how simple game mechanics like spin-the-wheel, quizzes, countdown bonuses, and personalized offers can capture customer attention. The session focused on how AI can analyze user behavior and create more targeted and effective holiday campaigns.

II. Narration of Events

Next, the speaker discussed different types of gamified campaigns. Examples included reward-based games, interactive challenges, and holiday-themed trivia. The speaker also explained how AI helps automate recommendations, send personalized messages, and analyze customer activity.
During the middle part of the webinar, the speaker showed several real examples of brands using gamification successfully. These case studies helped us understand how these ideas can be applied in real business settings.
After the main discussion, there was a Q&A session where students asked about the tools used for creating gamified content and how AI improves customer interaction.
The session ended with a short summary and closing message.

IV. Observation

The topic was timely and easy to understand. The speaker explained the concepts clearly and used examples that were relatable to students. I observed that many participants were interested in how AI creates personalized experiences for customers. The presentation slides were also organized, making it easier to follow the discussion. Overall, the webinar showed how technology, especially AI, continues to improve digital marketing strategies.

V. Recommendations/ Suggestions

I suggest that future webinars include a short hands-on activity so students can try making simple gamified elements. It would also be helpful to invite more industry professionals who can share real-life experiences in digital marketing and AI. Providing free tools or resources for students after the webinar would also help us apply what we learned.

VI. Certificate

Welcome to Purplebug Academy –
Your Registration is Confirmed!

Thank you for registering for our upcoming webinar,

"Holiday Game Plan: Gamified Campaigns with the Power of AI"

We're excited to welcome you to this insightful session.

Webinar Details:
- **Date:** September 24, 2025 (Wednesday)
- **Time:** 2:00PM to 4:00PM
- **Platform:** via Google Meet
- **Meeting Link:** meet.google.com/jvo-mpyy-zpu

The holiday season is the biggest sales opportunity of the year—but also the most competitive. Make your campaigns stand out with gamification and AI.

In "Holiday Game Plan: Gamified Campaigns with the Power of AI," we'll show how gamification and AI can cut through the holiday noise, keep customers engaged, and turn festive excitement into real business results. From spin-the-wheel and trivia to countdowns and personalized offers, you'll see practical strategies and tools you can apply to your own holiday campaigns

You'll also learn how Smicos AI Connect helps streamline customer analytics and personalization, giving your brand the edge it needs this festive season.

For any questions or assistance, feel free to reach out to us at inquiries@purplebugmail.net.

We look forward to seeing you in this forward-thinking session!

Blockchain Process
New data (e.g. a transaction) is entered into the blockchain.
A block representing this data is created.
The block is broadcast to all the nodes in the blockchain network.
If approved, the new block is added to the chain permanently.
