NARRATIVE REPORT

Name: Joshua M. Rabulan
Year and Course: 4F3 - BSIT
Topic: **VISUAL STORY TELLING: BRINGING CONCEPTS TO LIFE THROUGH DESIGN**
Speaker: Mr. Ivan Fababaer
Date and Time: November 28, 2025, 8:00 PM – 10:00 PM
Venue: MS TEAMS

I. Introduction

On November 28, 2025, I attended an online seminar titled **"Visual Storytelling: Bringing Concepts to Life Through Design,"** conducted by **Mr. Ivan Fababaer** via MS Teams. The purpose of the session was to help students understand how visuals, graphics, and design elements can communicate ideas more effectively. As a BSIT student, this topic was helpful because visual design is useful in creating websites, presentations, and user interfaces. I attended the session to improve my skills in presenting information clearly and creatively.

II. Narration of Events

The session started at **8:00 PM**. The host welcomed the participants and introduced the speaker, Mr. Fababaer, who is experienced in graphic design and digital media.
Introduction to Visual Storytelling
Mr. Fababaer began by explaining what visual storytelling means. He said it is the process of using images, colors, shapes, and layout to communicate a message or story. He showed examples of posters, infographics, and digital artworks to demonstrate how visuals can influence emotions and understanding.
Design Principles
He discussed basic design principles such as:

- **Color harmony**
- **Balance and alignment**
- **Typography**
- **Contrast and emphasis**
- **Simplicity and clarity**

He explained that good design is not only about looking nice, but also about making information easy to understand.
Hands-On Exploration
The speaker guided us through simple exercises, such as analyzing sample posters and identifying which elements made them effective. We also learned how to turn a plain idea into a creative visual output by choosing the right layout and design style.
Q&A and Closing
Near the end of the session, participants asked questions about design tools, techniques, and how to improve creativity. Mr. Fababaer encouraged everyone to practice and observe real-world designs for inspiration. The session finished at **10:00 PM**.

III. Knowledge / Learning Acquired

During the seminar, I learned:

1. How visuals can help deliver messages more clearly than text alone.
2. The basic principles of good design (color, layout, typography, balance).
3. How to create visuals that attract attention and guide the viewer's eyes.
4. How visual storytelling is used in advertising, presentations, and digital content.
5. The importance of creativity and consistency when designing materials.

IV. Observation

The session was well-organized and easy to follow. The speaker used examples and visuals that made the concepts easier to understand. Many students participated actively, especially during the analysis activity. Even though the event was online, it was engaging and informative. The speaker was confident and explained the ideas clearly.

V. Recommendations/ Suggestions

For future sessions, I suggest:

1. Adding a short hands-on activity where participants create a simple visual output.
2. Offering short tutorials on design tools like Canva, Figma, or Photoshop.
3. Providing downloadable materials or sample templates.
4. Allowing more time for Q&A to answer more design-related questions.
5. Including real industry examples of visual storytelling in IT and business.

VI. Certificate
